

September 27, 2021

Dear County Assessors:

What is the rate of inflation (IPD rate) for 2022?

The rate of inflation (IPD rate) for property taxes due in 2021 is 3.860 percent.

What is the limit factor for 2022 provided the taxing district adopts a resolution/ordinance authorizing an increase over the prior year's levy?

For the state and taxing districts with populations of 10,000 or greater, the limit factor for property taxes due in 2022 is **101 percent**. The limit factor for these districts is defined as 100 percent plus the lesser of the rate of inflation or one percent.

For taxing districts with populations under 10,000, the limit factor for property taxes due in 2022 is **101 percent**.

How is the rate of inflation (IPD rate) calculated?

The rate of inflation is the percent change in the implicit price deflator for personal consumption as published by the Bureau of Economic Analysis by September 25th.

The most recent publication available on September 25th was the August publication. For this reason, we used the quarterly values to calculate the percent change in implicit price deflator for personal consumption for taxes due in 2022.

We calculate the percent change by dividing the Quarter 2 2021 number by the Quarter 2 2020 number, subtracting one, and then multiplying by 100. We used the following values in the calculation this year:

Quarter 2 2020	110.491
Quarter 2 2021	114.756

If you have any questions, please contact me.

Sincerely,

Mark Studer
