

RULE-MAKING ORDER PERMANENT RULE ONLY

CR-103P (December 2017) (Implements RCW 34.05.360)

CODE REVISER USE ONLY

OFFICE OF THE CODE REVISER STATE OF WASHINGTON FILED

DATE: December 20, 2021

TIME: 12:06 PM

WSR 22-01-185

Agency: Department of Revenue
Effective date of rule:
Permanent Rules
□ 31 days after filing.
☑ Other (specify) January 1, 2022 (If less than 31 days after filing, a specific finding under RCW 34.05.380(3) is required
and should be stated below)
Any other findings required by other provisions of law as precondition to adoption or effectiveness of rule? ☑ Yes ☐ No If Yes, explain: The updated forest land values in WAC 458-40-660 are required by RCW 84.33.140 to be to be updated on or before December 31 for use the following year. RCW 84.33.091 requires the stumpage values in WAC 458-40-660 to be updated on or before December 31st for use the following January 1st through June 30th.
Purpose: WAC 458-40-540 contains the forest land values used by county assessors for property tax purposes; this rule is being revised to provide the forest land values to be used during 2022. WAC 458-40-660 contains the stumpage values used by timber harvesters to calculate the timber excise tax; this rule is being revised to provide updated stumpage values for the period from January 1, 2022, through June 30, 2022.
Citation of rules affected by this order: New:
Repealed:
Amended: WAC 458-40-540 Forest land values – 2021, WAC 458-40-660 Timber excise tax – Stumpage value tables –
Stumpage value adjustments.
Suspended:
Statutory authority for adoption: RCW 82.01.060(2) and 84.33.096.
Other authority: RCW 84.33.091; RCW 84.33.140
PERMANENT RULE (Including Expedited Rule Making) Adopted under notice filed as WSR 21-22-103 on November 2, 2021 (date). Describe any changes other than editing from proposed to adopted version: None.
If a preliminary cost-benefit analysis was prepared under RCW 34.05.328, a final cost-benefit analysis is available by contacting:

 $\underline{\text{AMENDATORY SECTION}}$ (Amending WSR 21-02-020, filed 12/28/20, effective 1/1/21)

WAC 458-40-540 Forest land values—((2021)) 2022. The forest land values, per acre, for each grade of forest land for the ((2021)) 2022 assessment year are determined to be as follows:

LAND GRADE	OPERABILITY CLASS	((2021)) <u>2022</u> VALUES PER ACRE
1	1 2 3 4	\$218 216 202 148
2	1 2 3 4	186 179 172 122
3	1 2 3 4	144 140 138 106
4	1 2 3 4	112 107 106 81
5	1 2 3 4	81 71 70 50
6	1 2 3 4	41 39 39 37
7	1 2 3 4	18 18 17 17
8	1	1

 $\underline{\text{AMENDATORY SECTION}}$ (Amending WSR 21-13-100, filed 6/18/21, effective 7/1/21)

WAC 458-40-660 Timber excise tax—Stumpage value tables—Stumpage value adjustments. (1) Introduction. This rule provides stumpage value tables and stumpage value adjustments used to calculate the amount of a harvester's timber excise tax.

(2) **Stumpage value tables.** The following stumpage value tables are used to calculate the taxable value of stumpage harvested from ((July 1 through December 31, 2021)) <u>January 1 through June 30, 2022</u>:

- (1) Log scale conversions Western and Eastern Washington. See conversion methods WAC 458-40-680.
- (2) Includes Western Larch.
- (3) Includes all Hemlock, Spruce and true Fir species, and Lodgepole Pine in SVA 6-7, or any other conifer not listed on this table.
- (4) Includes Alaska-Cedar.
- (5) Includes Western White Pine in SVA 6-7.
- (6) Stumpage value per ton.
- (7) Stumpage value per cord.
- (8) Includes Lodgepole posts and other posts, Stumpage value per 8 lineal feet or portion thereof
- lineal feet or portion thereof.
 (9) Stumpage value per lineal foot.
- (3) Harvest value adjustments. The stumpage values in subsection (2) of this rule for the designated stumpage value areas are adjusted for various logging and harvest conditions, subject to the following:
- (a) No harvest adjustment is allowed for special forest products, chipwood, or small logs.
- (b) Conifer and hardwood stumpage value rates cannot be adjusted below one dollar per MBF.
- (c) Except for the timber yarded by helicopter, a single logging condition adjustment applies to the entire harvest unit. The taxpayer must use the logging condition adjustment class that applies to a majority (more than 50%) of the acreage in that harvest unit. If the harvest unit is reported over more than one quarter, all quarterly returns for that harvest unit must report the same logging condition adjustment. The helicopter adjustment applies only to the timber volume from the harvest unit that is yarded from stump to landing by helicopter.
- (d) The volume per acre adjustment is a single adjustment class for all quarterly returns reporting a harvest unit. A harvest unit is established by the harvester prior to harvesting. The volume per acre is determined by taking the volume logged from the unit excluding the volume reported as chipwood or small logs and dividing by the total acres logged. Total acres logged does not include leave tree areas (RMZ, UMZ, forested wetlands, etc.,) over ((2)) two acres in size.
- (e) A domestic market adjustment applies to timber which meet the following criteria:
- (i) **Public timber** Harvest of timber not sold by a competitive bidding process that is prohibited under the authority of state or federal law from foreign export may be eligible for the domestic mar-

ket adjustment. The adjustment may be applied only to those species of timber that must be processed domestically. According to type of sale, the adjustment may be applied to the following species:

Federal Timber Sales: All species except Alaska-cedar. (Stat. Ref. - 36 C.F.R. 223.10)

State, and Other Nonfederal, Public Timber Sales: Western Redcedar only. (Stat. Ref. - 50 U.S.C. appendix 2406.1)

(ii) **Private timber** - Harvest of private timber that is legally restricted from foreign export, under the authority of The Forest Resources Conservation and Shortage Relief Act (Public Law 101-382), (16 U.S.C. Sec. 620 et seq.); the Export Administration Act of 1979 (50 U.S.C. App. 2406(i)); a Cooperative Sustained Yield Unit Agreement made pursuant to the act of March 29, 1944 (16 U.S.C. Sec. 583-583i); or Washington Administrative Code (WAC 240-15-015(2)) is also eligible for the Domestic Market Adjustment.

The following harvest adjustment tables apply from ((July 1 through December 31, 2021)) January 1 through June 30, 2022:

TABLE 9—Harvest Adjustment Table Stumpage Value Areas 1, 2, 3, 4, 5, and 9 ((July 1 through December 31, 2021)) January 1 through June 30, 2022

Type of Adjustment	Definition	Dollar Adjustment Per Thousand Board Feet Net Scribner Scale		
I. Volume per a	cre			
Class 1	Harvest of 30 thousand board feet or more per acre.	\$0.00		
Class 2	Harvest of 10 thousand board feet to but not including 30 thousand board feet per acre.	-\$15.00		
Class 3	Harvest of less than 10 thousand board feet per acre.	-\$35.00		
II. Logging con	ditions			
Class 1	Ground based logging a majority of the unit using tracked or wheeled equipment or draft animals.	\$0.00		
Class 2	Logging a majority of the unit: Using an overhead system of winch-driven cables and/or logging on slopes greater than 45% using tracked or wheeled equipment supported by winch- driven cables.	-\$85.00		
Class 3	Applies to logs yarded from stump to landing by helicopter. This does not apply to special forest products.	-\$200.00		
III. Remote island adjustment:				
	For timber harvested from a remote island	-\$50.00		
IV. Thinning				
Class 1	A limited removal of timber described in WAC 458-40-610 (28)	-\$100.00		

TABLE 10—Harvest Adjustment Table Stumpage Value Areas 6 and 7

((July 1 through December 31, 2021))
January 1 through June 30, 2022

Type of Adjustment Per Thousand Board Feet Adjustment Definition Net Scribner Scale

I. Volume per acre

Class 1 Harvest of more than 8 thousand board feet per acre.

\$0.00\$

Dollar Adjustment Per

Type of		Thousand Board Feet	
Adjustmer	t Definition	Net Scribner Scale	
Class 2	Harvest of 8 thousand board feet per acre and less.	-\$8.00	
II. Logging	conditions		
Class 1	The majority of the harvest unit has less than 40% slope. No significant rock outcrops or swamp barriers.	\$0.00	
Class 2	The majority of the harvest unit has slopes between 40% and 60%. Some rock outcrops or swamp barriers.	-\$50.00	
Class 3	The majority of the harvest unit has rough, broken ground with slopes over 60%. Numerous rock outcrops and bluffs.	-\$85.00	
Class 4	Applies to logs yarded from stump to landing by helicopter. This does not apply to special forest products.	-\$200.00	
Note: A Class 2 adjustment may be used for slopes less than 40% when cable logging is required by a duly promulgated forest practice regulation. Written documentation of this requirement must be provided by the taxpayer to the department of revenue.			
III. Remote island adjustment:			
	For timber harvested from a remote island	-\$50.00	

TABLE 11-Domestic Market Adjustment

Class Area Adjustment Applies Dollar Adjustment Per Thousand Board Feet Net Scribner Scale SVAs 1 through 5 only: \$0.00

Note: This adjustment only applies to published MBF sawlog

- (4) Damaged timber. Timber harvesters planning to remove timber from areas having damaged timber may apply to the department of revenue for an adjustment in stumpage values. The application must contain a map with the legal descriptions of the area, an accurate estimate of the volume of damaged timber to be removed, a description of the damage sustained by the timber with an evaluation of the extent to which the stumpage values have been materially reduced from the values shown in the applicable tables, and a list of estimated additional costs to be incurred resulting from the removal of the damaged timber. The application must be received and approved by the department of revenue before the harvest commences. Upon receipt of an application, the department of revenue will determine the amount of adjustment to be applied against the stumpage values. Timber that has been damaged due to sudden and unforeseen causes may qualify.
- (a) Sudden and unforeseen causes of damage that qualify for consideration of an adjustment include:
- (i) Causes listed in RCW 84.33.091; fire, blow down, ice storm, flood.
 - (ii) Others not listed; volcanic activity, earthquake.
 - (b) Causes that do not qualify for adjustment include:
- (i) Animal damage, root rot, mistletoe, prior logging, insect damage, normal decay from fungi, and pathogen caused diseases; and
- (ii) Any damage that can be accounted for in the accepted normal scaling rules through volume or grade reductions.
- (c) The department of revenue will not grant adjustments for applications involving timber that has already been harvested but will consider any remaining undisturbed damaged timber scheduled for removal if it is properly identified.

- (d) The department of revenue will notify the harvester in writing of approval or denial. Instructions will be included for taking any adjustment amounts approved.
 (5) Forest-derived biomass, has a \$0/ton stumpage value.
