

Special Notice

Intended audience: Buyers and sellers of carbon credits, offset credits, and allowances.

Nov. 30, 2021

Carbon cap and trade programs

Effective Jan. 1, 2023, there are two new programs related to reducing carbon dioxide and other greenhouse gas emissions.

- E3SHB 1091 relates to reducing greenhouse gas emissions by reducing the carbon intensity of transportation fuels.
- E2SSB 5126 relates to the Washington climate commitment act and reducing greenhouse gas emissions.

How does this impact me?

Income earned from selling, transferring, trading, or retirement of carbon credits, carbon offsets, and allowances is taxable under the Service and Other Activities business and occupation (B&O) tax classification.

Are there any deductions?

Yes, amounts earned from the generation, purchase, sale, transfer, or retirement of transportation fuel carbon credits are exempt from B&O tax and may be deducted. You will use the “other” deduction with the description “transportation fuel carbon credits”.
